Deck - Semi-transparent Stain: Pebble Mosaic

simply beautiful™
Simply Beautiful.™

1. CHOOSE THE EFFECT

CIL Woodcare™ Solid Hide Stain

Covers the wood grain completely with beautiful opaque colour, while preserving its natural texture and ensuring long-lasting protection.

CIL Woodcare™ Semi-Transparent Stain

Penetrates into the wood fibres to bring out all the detailed beauty of the natural wood grain, while adding subtle colour and ensuring long lasting protection.

CIL Woodcare™ Premium Cedar Treatment

Provides extra sunscreen protection on cedar, pressure treated lumber and all other wood types. Its cedar toned finish enhances the richness and natural beauty of the wood grain.

2. CHOOSE THE COLOUR

Simply select the colour you desire from the CIL Stain Colour samples inside this card or, for an expanded colour selection on solid hide stain, see the CIL Colour Display.

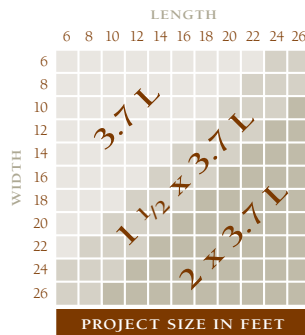

3. CHOOSE THE PERFORMANCE

CIL Woodcare™ Exterior Stains protect, penetrate and preserve the grain of the wood while enhancing and beautifying all exterior wood surfaces on and around your home.

CIL Woodcare™ Ultra Premium Exterior Stains provide maximum protection and penetration deep into the wood with a finish that delivers the ultimate in durability and scuff resistance for the longest lasting years of performance on horizontal and vertical surfaces.

CALCULATE THE AMOUNT OF STAIN

To determine the square footage, multiply the total length by the total width of your stain project, making allowances for doors, windows and other areas that will not be stained. Actual coverage will depend on the stain selected, the type and porosity of wood you are staining, its surface condition and previous treatments.
